

Woburn Consulting Group

Who are we?

A select group of pragmatic, hands-on executives providing individual and workable business solutions across multiple disciplines, specialising in the automotive and financial services sectors.

What is our USP?

We have vast experience of operating for nearly four decades in the real world in a difficult industry. We have continually faced and overcome the challenges that are a “new experience” to many companies and individuals.

Cost cutting and efficiency has been our life for decades - not a recent imperative driven by a difficult economy. We have extensive, practical and successful experience of developing and applying ‘lean’ working practices and technologies.

We have a track record of proven Global IT implementation experience – on time/on budget. We have developed and used tools for managing systems and risk that are “battle proven”, not mere theory.

What are our 3 key areas of strength?

Evaluating and executing Mergers, Acquisitions, Divestitures and Transformations.

Multi-layered, integrated business and IT strategy development & implementation. Using visual tools that bridge the knowledge and communication gap between IT and General Management. Delivering efficiencies and true business value.

IT Project Turnaround – identifying reasons for project failure and putting them back on track for successful completion on time and on budget.

What other Services do we offer?

- Funding advice and sourcing
- Risk Management
- IT and General Budget efficiencies - evaluation and management
- Off-shoring/outsourcing
- Interim Management
- Executive selection
- Personnel development & compensation planning
- Diversity/Equality planning
- Six Sigma quality regime
- IT Security/Sarbanes Oxley compliance
